

SELL SMARTER, DELIVER FASTER

Configurable and connected mobile sales, delivery and route management software

A powerful platform to drive business growth, revenue and customer satisfaction

Our cost-effective, end-to-end delivered wholesale and van sales solution is used by some of the best-known snack food and confectionery distributors in the UK and Ireland.

The powerful Mobile Enterprise Systems solution creates the operational hub for snack food businesses, connecting office and mobile workers in real-time to ensure efficient execution of front and back office operations.

Automating day-to-day field activities with real-time flow of information between mobile workers and office staff allows businesses to gain real competitive edge, whilst keeping 'costs to serve' to a minimum.

Our feature-packed software streamlines and automates business processes with features including route planning, customer and driver schedules, sales order management and inventory control, as well as industry-specific functionality developed especially for snack food businesses.

It also controls the integration between your back office accounting, ERP or warehouse management system.

Features	Benefits
Snack food and confectionery functionality	<ul style="list-style-type: none"> • Manage both wholesale delivery and van sales routes • Generate POD or invoice transactions • Instant POD updates with adjustments to orders and deliveries entered at point of delivery • Processes sales and returns from customers and tracks samples • Sale or return management • Cash customer management • Suggested orders for regular customers • Vendor-managed inventory tools to control customer store stock levels • Van stock management • Offer and promotion management to drive sales and promote marketing campaigns.
Rules-based, attribute-driven setup	<ul style="list-style-type: none"> • Manage mobile workers processes and workflow.
Maintenance of complex pricing requirements	<ul style="list-style-type: none"> • Manage all pricing and discounting options including customer-specific prices, group pricing, product quantity break pricing, and more.
Order entry management and integrated dispatching	<ul style="list-style-type: none"> • Speed entry of new telephone orders with the ability to generate new transactions based on customer-specific order templates. • Create route sequences that allow you to manage delivery schedules based on call frequency and customer SLAs. • Drag and drop customers and orders on to routes already in the field; all in real-time with visual dispatch/scheduling.
Comprehensive payment management and reconciliation	<ul style="list-style-type: none"> • Full in-store payment management, including cash payments. • End of Day sales, cash and stock summary with full payment reconciliation.
Seamless integration to a variety of third-party ERP solutions	<ul style="list-style-type: none"> • Maximise the value of information contained in your ERP through integrated system communication. • Span the gap between what is offered in your ERP and what is required to operate a modern van sales, service and/or delivery organisation.
Customer-centric functionality	<ul style="list-style-type: none"> • Single view of customer information such as sales history, quotes, pricing, routes and electronic proof of delivery (with photo capture) for fast response to customer queries.
Usable GPS	<ul style="list-style-type: none"> • Real-time view of mobile worker location and progress, maximising customer service and route profitability and allowing you to monitor progress against customer SLAs. • Operates offline with no data connection required.
Real-time communication	<ul style="list-style-type: none"> • New orders and instructions are sent instantly to mobile workers via their mobile/tablet devices, and route progress and live transaction data is sent back to the office for faster, more efficient processing.
Complete control of business operations	<ul style="list-style-type: none"> • In-depth management and KPI reporting.
